PROFESSIONAL SUMMARY

Aspiring Python Backend Developer with hands-on experience in Flask, Django, MySQL, and web systems. Strong understanding of REST APIs, SQL, and role-based applications. Eager to contribute to scalable backend systems in a tech-driven environment.

EDUCATION

Master of Computer Applications (MCA)

IMSEC, Ghaziabad
2024 – 2026 (Pursuing)

Bachelor of Computer Applications (BCA)

Inmantec Institutions, Ghaziabad
2021 – 2024

Class 12 (CBSE)

Kendriya Vidyalaya Kamla Nehru Nagar, Ghaziabad
2021

Class 10 (CBSE)

Kendriya Vidyalaya Sikh Lines Meerut Cantt, Meerut
2019

SKILLS

Technical Skills

Languages & Frameworks:
Python , C, HTML, CSS, JavaScript (Basic)
Frameworks:
Django, Flask
Database Systems:
MySQL, SQLite, SQL, DBMS
Tools & Technologies:
Bootstrap, Git, GitHub, Jinja2
Concepts:
REST API, CRUD, ORM, MVC architecture

Soft Skills

Problem Solving
Analytical Thinking
Quick Learning Ability
Team Collaboration
Time Management
Clear Communication

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (IAI-102)
- Microsoft: Fundamentals of AI Concepts
- Microsoft: Generative AI Fundamentals
- Certificate of Excellence – Build & Beyond, IMSEC
- Certificate of Appreciation – Build & Beyond, IMSEC
- Hackathon Participation – IoTVerse Hackathon 2K25, CSE Department, IMS
- Workshop on JavaScript – 1-day workshop by Softpro India, IMSEC

ACADEMIC PROJECTS

E-Commerce Web Application

Technologies: Python, Django, HTML, CSS, SQLite

- Developed a fully functional e-commerce web platform as part of academic learning.
- Implemented key features including homepage, product listing, add to cart, order tracking, and checkout module.
- Designed responsive UI using HTML/CSS with Bootstrap support.
- Integrated SQLite database to manage products, user orders, order updates, and contact details.
- Used Django's MVC architecture to handle routing, authentication, and backend operations.

ParkEasy – Vehicle Parking Management System

Technologies: Python, Flask, SQLite, SQLAlchemy, HTML, CSS, Bootstrap 5, Chart.js, Jinja2

- Designed and developed a multi-user vehicle parking system with role-based access for admins and users.
- Built using Flask for backend logic and routing, and SQLAlchemy ORM with SQLite for persistent data handling.
- Implemented user roles:
 - Admins can manage parking lots, spots, and users; access analytics dashboards with Chart.js.
 - Users can search, book, release spots, view booking history, and analyze usage summaries.
- Built a responsive UI using Bootstrap 5 with separate admin/user views rendered via Jinja2 templates.
- Integrated smart booking logic to auto-assign the first available spot dynamically.
- Developed interactive dashboards showing trends such as revenue, bookings, and peak usage hours.

SmartHouseHub – Household Service Web Application (Ongoing)

Technologies: Python, Flask, MySQL, SQLAlchemy, HTML, CSS, Bootstrap 5, JavaScript, Jinja2

- Developed multi-role platform for Admins, Professionals, and Customers using Flask routing and role-based access
- Built service booking, authentication, ratings, and payment modules with responsive Jinja2 UI
- Integrated MySQL backend using SQLAlchemy ORM
- Built RESTful APIs using Flask and SQLAlchemy for handling service booking and user management (CRUD)
